PROFILE SUMMARY

Highly skilled Frontend Developer with a strong background in crafting user-friendly websites and web applications. Proficient in translating design concepts into functional, high code while prioritizing performance optimization to ensure seamless user experiences. Experienced in using Redux for state management and integrating REST APIs. Committed to delivering top-quality solutions that meet and exceed project requirements.

KEY SKILLS

Programming Languages and Web Technologies: JavaScript, TypeScript, CSS/SCSS, Tailwind CSS
Libraries and State Management: React, Redux Toolkit
Frameworks: Next.js
Web API Development and Integration: REST API, Swagger UI
Testing: Jest
Version Control: Git
Other skills: Web App Development, Reusable Component Architecture, Design-to-Code Translation, Cross-Browser Compatibility, Quality Assurance and Performance Optimization, SDLC, Agile Team Collaboration (Scrum),

WORK EXPERIENCE

React Developer
First City Monument Bank (FCMB), Lagos   **October 2022 – Till date**
- Spearheaded the development of user-facing features using React.js within the Vendor Switch Web Application (CIMG Portal), enhancing the application's functionality and usability.
- Engineered a collection of reusable components and frontend libraries, laying the foundation for streamlined development and improved code maintainability for future projects.
- Translated intricate designs and wireframes into high-quality, production-ready code, ensuring seamless alignment between design concepts and the final user experience.
- Demonstrated expertise in optimizing components for peak performance across a diverse range of web-capable devices and browsers, delivering an exceptional user experience across the board.
- Managed application state using Redux Toolkit, empowering the application to efficiently handle complex data interactions and maintain a responsive user interface.
- Seamlessly integrated REST APIs via Swagger UI, leveraging Redux Thunk middleware to ensure reliable communication between the frontend and backend systems, enhancing data exchange and functionality.

Frontend Developer Intern
Gomycode, Lagos   **February 2022 – October 2022**
- Provided crucial support to cross-functional teams throughout the lifecycle of various in-house projects, ensuring seamless development, deployment, and documentation processes.
- Designed, built, and maintained web applications, with a strong emphasis on enhancing user interface elements, including interactions and style, resulting in improved user experiences.
- Translated graphic designs and wireframes into functional code, bridging the gap between design concepts and fully operational web applications.
- Played a pivotal role in analyzing development quality and ensuring smooth deployment, while also focusing on observability and performance optimization in production environments.
- Collaborated within a Scrum team, contributing to agile development methodologies and fostering efficient teamwork to meet project milestones.
- Participated in critical decision-making processes related to architectural and technological choices necessary for implementing new features, ensuring alignment with project goals and objectives.

EDUCATION

University of Lagos, Akoka, Lagos   **2015 - 2019**
BSc Geography
